

17 goals for a world worth living in

The United Nations (UN) is an association of 193 countries. These countries want to work together to ensure that the world remains a liveable place or even is improved. In their 2030 Agenda, from September 2015, they list 17 goals for a world worth living in.

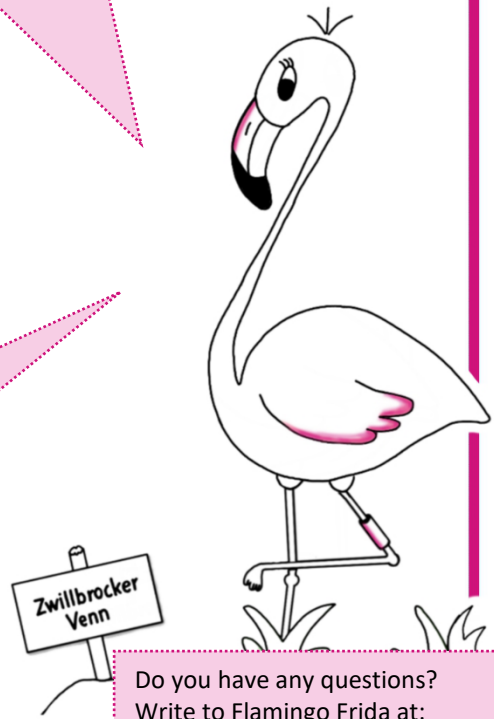

Find out what the 17 goals for a world worth living in are!

- To get to know the 17 goals, you can play Frida's memory-game:
<https://www.stiftung-nlw.de/fridas-memory/>
- In the online brochure "Agenda 2030" of the state of NRW, the 17 goals are explained for children in simple language:
<http://broschüren.nrw/agenda-2030-dt>
- In the YouTube video "SDGs easily explained", children explain the goals for sustainable development:
<https://www.youtube.com/watch?v=dip4UFum87s>

Hi, I'm Frida Flamingo! Nice that you are researching too. Today is about "17 goals of the 2030 Agenda for a world worth living in". Each country should name its own goals and implement them by 2030. We want a world worth living in for everyone.

The 17 goals of the 2030 Agenda are also called: "17 Sustainable Development Goals" or abbreviated "17 SDGs".

Researcher's "book of Records" Your creativity is required!

Everyone can do something to make sure our world remains a place worth living in and even to improve it. You too can change the face of the earth! It's up to us, how do we want to live now and in the future?

My ideas for a world worth living in

These things should improve:

- _____
- _____
- _____

This is what I can do:

- _____
- _____
- _____

This is what the politicians should make decisions on:

- _____
- _____
- _____

You will find that everything is connected in some way or another. Unfortunately, there are no simple solutions. And often one also doesn't have all the information on a topic.

And yet we can and must make decisions so that we can create a world worth living in for everyone, now and in the future.

Tip: When experimenting follow general safety instructions!
